

R1800 PRINT SETTINGS

Simple Profile Installation to your computer's system: (PC / MAC OSX)

Print Driver settings:

You will find below the main driver settings for use with Lyson's PhotoChrome R series pigment inksets. Most settings will be entered either into the "Print Settings" or "Colour Management" section of the print driver with the exception of the actual selection of the profile itself which is in the print driver's main / front page :

Profile / Print Space – "R1800 PhotoChrome Luster 265gsm Gloss" (select the relevant profile as per paper in use from the list of available profiles)

Intent Relative Colormetric

Black Point Compensation - Ticked

Media Type - Premium Luster Photo Paper

Color - Color

Mode - Advanced

Print Quality – Photo / Best Photo (optimum)
